

Puzzle title: The Final Incantation

Location: Hummus Kitchen, 4th Ave between Ellsworth and San Mateo Dr.

Set-up: Display the sign. You should have a bag of scrolls with blue wax seals on them. When the team shows you the green screen, hand them one rolled-up scroll.

Interaction: remind teams to buy food if they're going to sit at this restaurant. And, actual food, not just a soda. Desserts and appetizers are pretty tasty here. It's even reasonable to check in on teams to be sure they're being good citizens in this regard.

CK Hint/Partial Data [squares = minutes, hexes = points]:

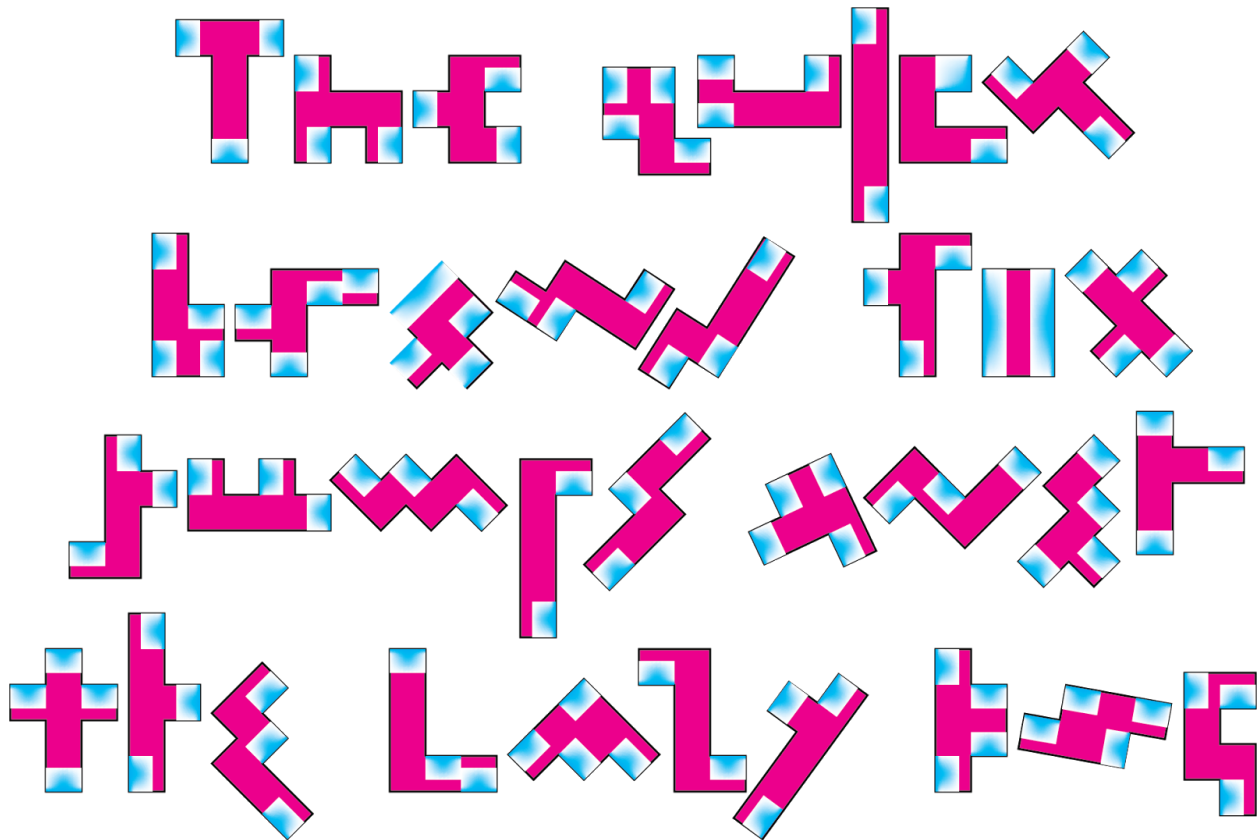

5 pts BOWL,NOVA,CRUSHED,JOY,TM, QUIZ, KFOG
Yes, that is one of your "previous experiences".

- 5** You need to cover up all the markings with hexominoes to find the incantation. When you think you know the incantation, enter it into Cluekeeper.
- 17** Each marking has a sharp edge (in one case, two sharp edges) that indicate the hexomino covering that marking doesn't extend past that edge. All 35 hexominoes will be used.
- 27** Breezily deciphering the unknown incantation requires viewing each juxtaposed hexomino as a different letter.
- 32** The incantation is a well-known pangram whose subject is a speedy russet vulpine.
- 39** "Use all your previous experiences..." so, maybe do something with the letters in the answers you have?
- 46** Take each previous answer and remove the letters matching those answer from your pangram. For example, for BOWL, remove the BOW from BROWN and the L from LAZY.

25 pts	THEQUICKBROWNFOX[JUMPS] Yes, that's the start of the correct incantation.
26 pts	..ALAZY.., ..JUMPED.., ..DOGS That's close, but the correct incantation should have the same number of letters as you have hexominoes.
27 pts	THEQUICKBROWNFOXJUMPSOVERTHELAZYDOG Yes, that's the correct incantation.
33 pts	HEXPET,EXPERT,EXPET,THE EXPERT, THREE,THREEX You've made a small mistake somewhere... the regular puzzle answers add up to only 28 letters.
33 pts	THEXPRE,XPERTHE,HERXPET, RXPETHE,TERHEPX,THEPREX Close, you should be crossing out the letters in order from left-to-right, not randomly.
35 pts	HEXPERT (correct answer)

Solution walk-through:

- Teams line up the pieces on the cyan marks with these rules that they have to figure out:
 - Each mark is fully covered.
 - Each piece covering a mark has an edge on the sharp edge of that mark.
- Some useful tips:
 - Drawing a square cell on a cyan mark, and an X on the space on the other side of that mark can help visualize where the piece must go.
- After all the marks are covered, a team can read the message
THEQUICKBROWNFOXJUMPSOVERTHELAZYDOG:

- Teams cross out the answers to all previous puzzles from that message, in order from left to right:
 - THEQUICKBROWNFOXJUMPSOVERTHELAZYDOG
 - -----B-OW-----L----- The Creepy Orphanage
 - -----N-O-----V-----A----- The Administrator's Office
 - -----C--R-----U--S-----HE----D-- The Corrupt Casino
 - -----J-----O-----Y--- The Downtown Meeting
 - T-----M----- The Underground Lab
 - ---QUI-----Z---- The Third Degree
 - -----K-----F-----OG The Radar Detectors
 - -HE-----X---P---ERT----- (leftovers)
- The remaining letters spell out **HEXPERT**, the final answer.
